Tow Eyes and Tie Down Hooks

Tow Eye (Left) and Tie Down Hook (Right)
Before Installation of Tow eyes

Note the welded nuts on the inner side of the frame member opposite of where the bumper bracket is bolted on.
After Installation of Tow Eyes

Washers not yet painted to better show the installation.

Note the two bolts.
Before Installation of Tie Down Hooks

Arrow points to the Rear Spring Shackle Pin.

Remove the nut on the Rear Spring Shackle Pin
Install the Tie Down Hook and replace the nut. The Tie Down Hook may need to be modified slightly to fit.
