

Choke Return Springs for a BJ8

It seems many dealers fitted choke return springs on the HD8 Carbs as needed. Ed Kaler of justbrits.com offers this unique idea.

I have always used 3 ball point pen springs slid over the choke cables and captured between the cable bracket and the pin that goes through the choke lever. This is very hard to see and doesn't require any drilling, bending or whatever to the car. And, by George it sure works...
