

Rocker Arm Rebuild

Rocker Arm Specialists, home of the \$98 rocker shaft rebuild, will do complete disassembly, straighten rocker shaft, center grind undersize, hard chrome plate and regrind to current spec. I already had a new rocker shaft, so I shipped my assembly with that. Turn around from coast to coast was under 2 wks. and my cost was \$85 plus shipping. My unit was returned with rockers refaced, new screws and nuts, and new bushings installed and reamed. Installed it this weekend and the rocker arm oil geysers have been reduced to a trickle. Overall, I'm one satisfied customer.

The company is Rocker Arm Specialists, 19841 Hirsch Court, Anderson, CA 96007 Tel. (530) 378-1075. HML
