

Body Protection while under Repair

This one is so obvious I don't know if it is worth your putting up but in any case see the attached photo. I bought a cheap comforter at Walmart and cut out the opening for hood and mirrors, then took it to a local seamstress for sewing on the piping. It fits both my car as well as my wife's 3000. If I had to do it again I would probably leave a bit more material on both sides to better protect the painted edges of the surround.

Also you can use furniture pads that Moving Companies use on their vans.
